Student Honor Code

UMBC Student Honor Code

By enrolling in this course, each student assumes the responsibilities of an active participant in UMBC's scholarly community in which everyone's academic work and behavior are held to the highest standards of honesty. Cheating, fabrication, plagiarism, and helping others to commit these acts are all forms of academic dishonesty, and they are wrong. Academic misconduct could result in disciplinary action that may include, **but is not limited to**, suspension or dismissal. To read the full Student Academic Conduct Policy, consult the UMBC Student Handbook, the Faculty Handbook, or the UMBC Policies section of the UMBC Directory.

Textbook

- Data Structures and Algorithm Analysis in C++, 3/E
- **Mark Allen Weiss**, *Florida International University*
- ISBN: 0-321-37531-9
- Publisher: Addison-Wesley
- Copyright: 2006

Prerequisites

- CMSC 202 – C++ programming
 - Class design
 - Operator overloading
 - Pointers and dynamic memory management
- CMSC 203
 - Proof by induction
 - Permutations and combinations

Data Structure

- What is a “data structure”?
- How are they implemented?

Abstract Data Type

- What is an ADT?
